Arabsat 5c satellite Internet offer

Arabsat 5c

TS2 SPACE would like to offer you a broadband access to the Internet in areas where telecommunications infrastructure is weak or non-existent. The main medium of transmission is a broadband two-way satellite transfer system, which provides stable access to the Internet in the least accessible areas. We not only provide an Internet connection, but also a wide range of additional services, which we can start on iDirect Evolution platform.

Arabsat 5C coverage map

Minimum Equipment required:

- 1.8M antenna/
- iDirect Evolution X3/X5 Modem
- 5W BUC
- PII LNB

Equipment cost:
2 680 USD
